NETRONX

PLAYABLE PRODUCT / OPTIONAL UTILITY / TRANSPARENT DIRECTION

WHITEPAPER

Version 1.0 / July 2026

INFORMATIONAL PROJECT DOCUMENT

This document explains the current design and intended direction of NetronX, Netron Tanks and NTX. It is not investment advice, a guarantee of return or a promise of permanent feature availability.

NETRONX.GAMES

CHAPTER / 00

Document map

A consolidated reference for the ecosystem, product, utility model, launch structure and principal risks.

CHAPTER / 01

Executive summary

NetronX is a product-led gaming ecosystem built around playable experiences, persistent progression and optional digital utility.

Playable product first

NetronX begins with Netron Tanks, a working competitive product. Blockchain functionality is optional and must support a real use case.

Access without a wallet

Players can create an account, play and progress without holding NTX or connecting a blockchain wallet.

Utility before speculation

NTX is intended for selected products and services. It does not represent equity, ownership, debt or a guaranteed return.

Transparent status

Live, developing, planned and unavailable systems are identified separately.

Informational status. This whitepaper explains the current design and intended direction of NetronX. It does not promise a token price, income, liquidity, rewards, permanent feature availability or a completion date.

CHAPTER / 02

Ecosystem and product

A real product is the foundation of the ecosystem, not a future justification for a token.

NetronX

The ecosystem layer connecting products, community systems, documentation, security standards and optional NTX functionality.

Netron Tanks

The first playable world: a browser-based team combat game with accounts, matchmaking, equipment, ranks, cosmetics, cases and progression.

Netron Tanks remains playable without NTX. The long-term product objective is to expand content, competitive systems, community participation and carefully selected utility without forcing blockchain interaction into normal gameplay.

CHAPTER / 03

NTX utility

NTX is an optional Solana-based utility asset intended to support selected ecosystem functionality.

Digital assets Selected cosmetics, cases and premium game content.	**Memberships** Optional account benefits and ecosystem services.
Events Selected competitive and community experiences.	**NTX marketplace** A dedicated catalogue of rotating offers available through NTX.
Wallet top-up Planned transfer of supported NTX balances into the in-game wallet after security controls are complete.	**Ecosystem access** Future product functionality activated only when technically ready and publicly documented.

Availability, pricing, eligibility and regional access may differ by feature. A stated use is not active until the corresponding interface and status are publicly available.

CHAPTER / 04

Technical profile

ASSET	NTX
NETWORK	Solana Mainnet
MAXIMUM SUPPLY	500,000,000 NTX
ADDITIONAL MINTING	Not permitted
CONTRACT ADDRESS	H2HKaE1ZwwDo16EXkwtfr2GmqumRRpZtukr3sFro76Yt
PUBLIC MECHANISM	PinkSale Fair Launch
IN-GAME REQUIREMENT	Optional
FINANCIAL RIGHTS	None

CHAPTER / 05

Public Distribution and Fair Launch

The public allocation is described as Public Distribution and is planned through a PinkSale Fair Launch.

10%
OF FIXED SUPPLY

- 10% of the fixed supply is assigned to Public Distribution.
- Distribution is planned through an external PinkSale Fair Launch.
- The official Fair Launch link will appear only on verified NetronX channels.
- No separate private allocation is described in this distribution model.
- Participation does not guarantee price appreciation, profit, liquidity or future feature access.
- Final launch parameters, timing and access conditions are published with the official pool.

CHAPTER / 06

Fixed tokenomics

The maximum supply is fixed at 500,000,000 NTX. Allocation totals 100%.

ALLOCATION	SHARE
Ecosystem and Rewards	30%
Treasury and Development	20%
Liquidity and Listings	15%
Team and Contributors	10%
Public Distribution	10%
Marketing and Partnerships	10%
Strategic Reserve	5%

CHAPTER / 07

Liquidity, listings and locks

15% - Liquidity and Listings Allocation reserved for decentralized liquidity and launch listings.	**LP burn** LP tokens created at launch are intended to be sent permanently to a verified burn address.
12-month team lock The complete Team and Contributors allocation is subject to a 12-month lock.	**Public evidence** An intention becomes independently verifiable only after its transaction or lock record is published.

The Transparency page distinguishes configuration from executed actions and provides the relevant public references when available.

CHAPTER / 08

Wallet and in-game economy

Gems, NTX Points and NTX are separate systems with different rules.

Gems Internal gameplay currency. Not withdrawable and not automatically connected to NTX.	**NTX Points** Internal eligibility record. Not automatically on-chain, transferable or guaranteed to convert.
NTX Separate blockchain utility asset used only through supported ecosystem functionality.	**Wallet status** Balance top-up, history and reconciliation are in development. Withdrawals remain unavailable.

- Balances created through errors, duplicated rewards, exploits or manipulation may be corrected.
- Holding an internal balance does not create a guaranteed conversion, withdrawal or cash claim.
- Future withdrawal requests may be subject to minimums, fees, eligibility checks and extended review.

CHAPTER / 09

Security, fair play and integrity

Account integrity

Gameplay, progression, economy and rewards may be reviewed for cheating, automation, exploits or coordinated abuse.

Wallet safety

NetronX will never request a private key, seed phrase or recovery phrase.

Withdrawal review

Future requests may be delayed, adjusted or rejected when security, eligibility or abuse concerns exist.

Economy protection

Balances produced by errors, farming, chargebacks or manipulation may be corrected or removed.

Public evidence

Contract, launch pool, team lock and liquidity burn references are published when their actions exist on-chain.

User responsibility

Users are responsible for account access, wallet custody, address verification and transaction confirmation.

CHAPTER / 10

Development path

Roadmap phases communicate direction and current status, not guaranteed delivery dates.

01 / COMPLETED - FOUNDATION	**Core gameplay, Unity WebGL, equipment, progression, ranks, shop, cases and product websites.**
02 / ACTIVE - PLAYABLE ALPHA	**Accounts, matchmaking, server infrastructure, testing, balancing and bug fixing.**
03 / IN DEVELOPMENT - COMMUNITY	**Creator outreach, events, gameplay content, public testing and moderation.**
04 / IN DEVELOPMENT - NTX INFRASTRUCTURE	**Tokenomics, utility architecture, security controls, contract and launch preparation.**
05 / IN DEVELOPMENT - IN-GAME NTX WALLET	**Wallet connection, top-up, account synchronization, history and reconciliation.**
06 / PLANNED - NTX UTILITY MARKETPLACE	**Rotating offers available through NTX, including selected products and services.**
07 / PLANNED - EXPANSION	**New content, competitive systems, broader utility and evaluation of future products.**

CHAPTER / 11

Risk disclosure

Digital assets and developing products involve material risk.

- NTX may lose some or all market value.
- Liquidity may be limited or unavailable.
- Smart contracts, wallets, networks and third-party platforms may fail or be exploited.
- Roadmap items can change, be delayed or be removed.
- NTX functionality may be restricted in some jurisdictions.
- Game balance, reward rates and eligibility rules may change to protect the product economy.
- Transactions on Solana are generally irreversible after confirmation.
- PinkSale, DEX interfaces and wallet providers operate independently from NetronX.

NO FINANCIAL PROMISE

NTX is not equity, debt, ownership, a deposit or a promise of income. Nothing in this document guarantees market value, liquidity, rewards or financial return.

CHAPTER / 12

Official verification

Trust complete addresses and transaction records, not screenshots, direct messages or copied announcements.
